

Name: Test Student      Class: 6C

1. Refraction is the bending of light when it passes from one medium to another.

2 (i) The angle of incidence equals the angle of reflection, and both rays lie in one plane.

2 (i) (a) Diagram drawn with incident ray, normal and reflected ray labelled.

2 (ii) The watt.

3. Water is denser than air, so sound waves travel through it more quickly.

4. A current-carrying coil placed in a magnetic field experiences a force, which turns the coil and converts electrical energy into rotation.
